WALLS BUILT FOR LIFE

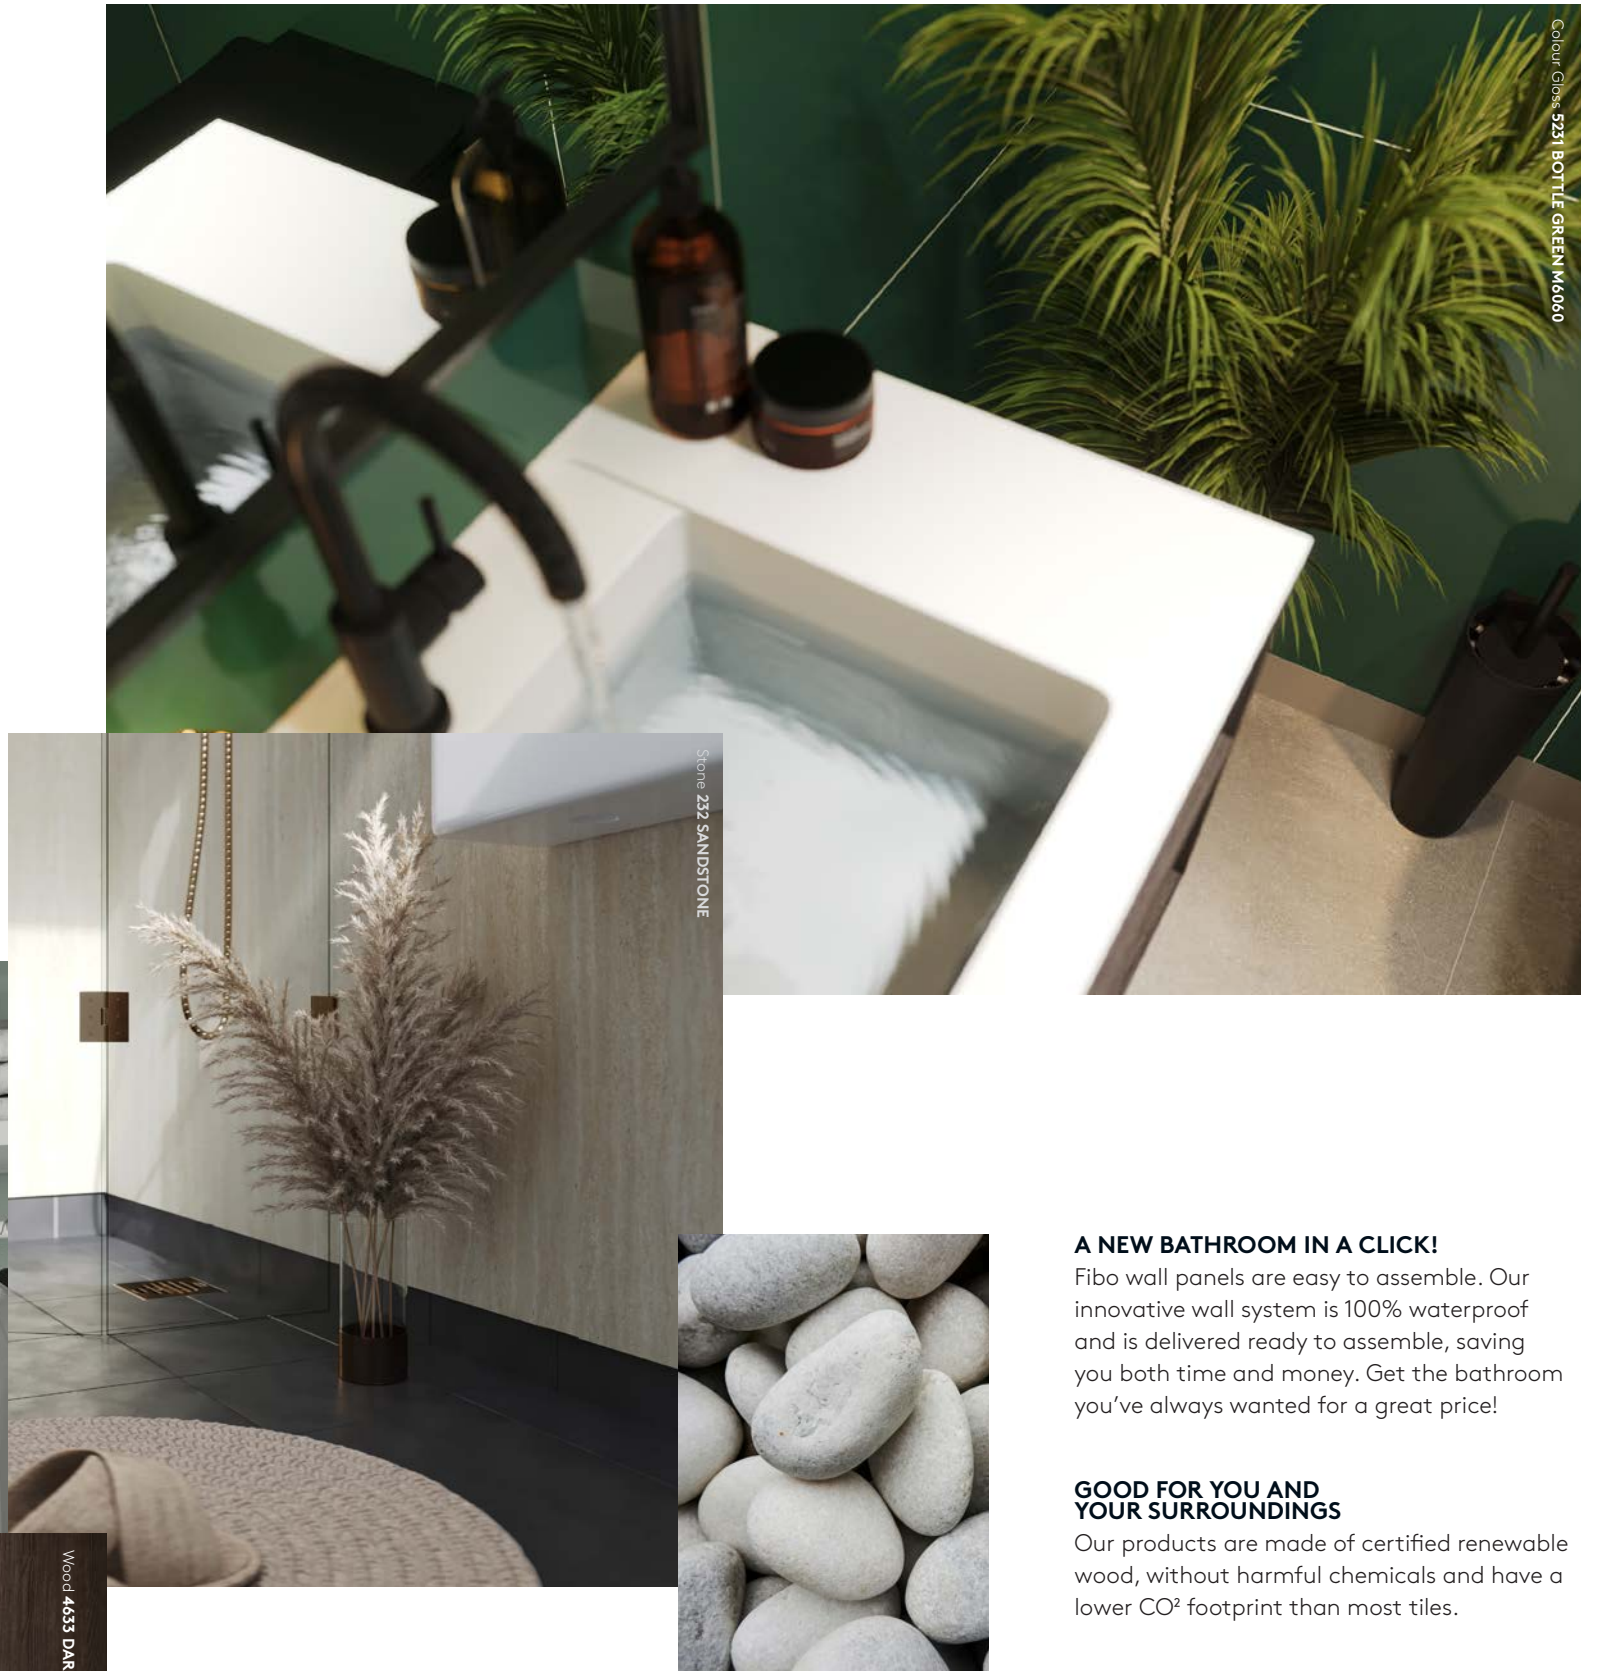

WELLBEING, RELAXATION, AND FUNCTIONALITY

From our very beginning, Fibo's focus on innovation has been our greatest driving force. Wet rooms leave little room for error. Our products are tested to meet the highest wet room standards, and it's why building contractors, public sector developers, and skilled tradespersons all choose Fibo.

CREATE YOUR DREAM BATHROOM

Our bathrooms are perhaps our most personal and intimate space in the home. Once seen as a place to cleanse our bodies, they are now a place of sanctuary. Somewhere where we go to escape the stresses of everyday life and to feel rejuvenated.

Almost everyone visiting your home sees your bathroom. As well as providing a relaxing atmosphere, it should be easy to clean, hygienic and functional by design.

A NEW BATHROOM IN A CLICK!

Fibo wall panels are easy to assemble. Our innovative wall system is 100% waterproof and is delivered ready to assemble, saving you both time and money. Get the bathroom you've always wanted for a great price!

**GOOD FOR YOU AND
YOUR SURROUNDINGS**

Our products are made of certified renewable wood, without harmful chemicals and have a lower CO² footprint than most tiles.

AT HOME WITH NATURE

Scandinavian design represents the simple and the functional. We want solutions that provide a sustainable lifestyle. Not only for ourselves, but for nature and the people around us.

WOOD

Wood 4633 DARK WOOD M76

NATURAL WOOD STRUCTURE

By using panels with a wood texture, nature is invited in. Different textures accentuate and soften the wood feel, and there is something for every taste.

Combine with other natural materials such as cotton, linen, wool, ceramics, and glass to enhance the natural feeling.

And hey...
There's no problem with showering directly against the wooden wall!

Wood 1412 AVALON PINE M6040

Wood 2159 LIGHT WOOD M0500

WOOD 2164 PURE OAK M00

Wood 7969 ROUGH WOOD M00

* Decor marked with a star is also available in long lengths in the collections Tall 2720mm and/or Long 3020mm.
** The pattern on one panel may not perfectly match the pattern on the next panel, which can result in visible seams. Such patterns are recommended for tile layouts.

STONE

STONE STRUCTURES AND NATURAL FINISHES

Bring nature indoors! Choosing a mineral decor will give your wall a natural look. We are introducing four new stone decors that truly elevate the collection. Both Beige Stone and Grey Stone come with an Extreme Matt finish that you should really experience!

The collection offers a wide range of possibilities, and it's a good idea to check the tile patterns in which the various decors are available. Keep in mind that the tile pattern significantly affects the appearance of the panels.

Stone decors also complement other color decors nicely. Experiment and find your favorite combinations!

3D

THE MOST TACTILE SURFACE
The panels in this collection are manufactured with synchronized height and surface differences in the structure and joints, which results in a three-dimensional and highly lifelike appearance.

Please note that the 3D decors are specially designed to have lifelike joints, which are approximately 6 mm wide. The width can vary slightly. Also, keep in mind that the joints are not milled but are part of the synchronized panel surface, so these panels are exclusively available in the 60x30 cm tile pattern.

FIBO FIRE-RATED PANEL

Fibo Fire Rated Panel is a waterproof, high-quality building material that meets the requirement for a surface with fire classification B-s1, d0. The panels are approved according to the wet room standard by Sintef, come with a 15-year warranty, and have an expected lifespan of at least 30 years. The combination of this fire classification and a robust panel that is easy to install, maintain, and requires no post-installation finishing within the same panel is quite unique. It is this distinctive feature that sets the Vito Fire Rated Panel apart from most of its competitors.

The Fibo Fire Rated Panel is made from a 6.4 mm high-pressure compact laminate, featuring an integrated locking system for easy installation and almost seamless joints.

FACTS

Measurements: 6.4 x 620 x 2720mm

Application Area: All rooms, including wet rooms.

Fire classification B-s1, d0: Contributes very limitedly to fire, produces very limited smoke, and does not form burning droplets.

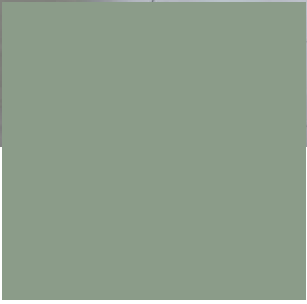

Profiles for Fibo Fire Rated Panel are available for internal and external corners

Sealant: Standard sealant is used in joints, and fire sealant must be used to seal the system around doors/windows and against the ceiling/floor.

THE EXPANDED ROLE OF THE KITCHEN

We spend large parts of our time at home, and we use that time for everything from cooking to renovation projects. Our homes should reflect who we are and meet various needs. We would like to renovate, but have things ready at once.

COZINESS IN NATURAL ENVIRONMENTS

The kitchen is the heart of the home, not just a place for cooking and eating. It's also where we gather for meetings, do homework, socialize, and have some personal time. We seek solutions that promote a sustainable lifestyle, not only for ourselves but also for nature and the people around us.

TIMELESSNESS IN AN INSTANT

Fibo Kitchen Board is the fastest way to renew and add a personal touch to your kitchen. We offer a wide range of easy-to-maintain and low-maintenance panels. Fibo Kitchen Board can be mounted directly on the framework or existing walls. Follow the installation instructions provided with the product or visit fibo.se, and you are guaranteed a stylish result in no time!

ROBUST PANELS THAT CONCEAL THE BACK WALL
Fibo Kitchen Board has a core of sturdy plywood. With these panels, you get an easily installed, decorative wall that conceals any irregularities on the back wall and is also easy to keep clean.

IN A NATURAL WAY
Scandinavian design represents simplicity and functionality. We are looking for solutions that promote a sustainable lifestyle, not only for ourselves but also for nature and the people around us.

More about
FIBO PRODUCTS

KITCHEN WALLS THAT WITHSTAND COOKING

Fibo Kitchen Board is a simple and smart solution that protects the wall from water splashes and cooking grease during meal preparation. The system provides seamless joints and a stylish transition between the back wall and the countertop.

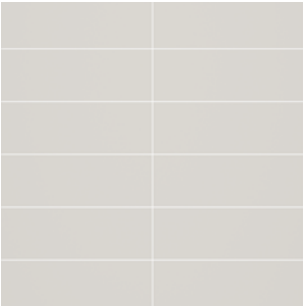

More about
KITCHEN BOARD

Please note!
If the stove emits more than 80°C towards the back wall, a heat protection panel should be used in front of Fibo's Kitchen Board. Our panels have a fire class of D-s1, d0 and are based on wood products.

TEMPERED GLASS BEHIND SINK OR COOKTOP

Fibo's glass panels both protect and enhance the wall behind the cooktop or sink. The glass panel is scratch-resistant and easy to clean with a damp cloth.

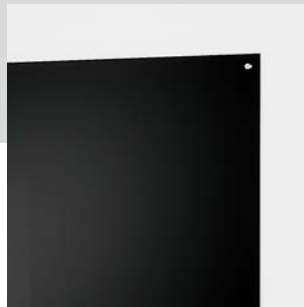

Our tempered glass panels come in 6 mm thickness, 450 mm height, and either 700 or 900 mm width in the colors clear, white, and black. The panels can be mounted directly on wallpaper or painted surfaces. The wall behind is then protected against water, grease, and high temperatures.

POPLAR PANEL Untreated

WATERPROOF WALL WITH FIBO'S WALL SYSTEM

Base profile Internal corner profiles External corner profiles Other profiles

Fibo's wall system provides a 100% waterproof wall with all the necessary approvals for wet rooms. The system comes as a complete set with panels, accessory products, and profiles that simplify the installation process and ensure a perfect result.

WATERTIGHT WITH AQUALOCK CLICK-LOCK SYSTEM
Fibo's wall panels come with a unique 100% waterproof Aqualock click-lock system for easy installation. To ensure a waterproof surface and an approved bathroom, installation must always be done using Fibo Seal in joints, Fibo's own profiles and accessory products, and in accordance with the current installation guide. Watch our installation videos on fibosystem.com.

ANTIBACTERIAL BENEFITS
All Fibo wall panels now come with a documented antibacterial effect. Our panel surfaces contain no harmful substances, require no special maintenance, and are tested according to the ISO 22196 standard - this means that it is virtually impossible (99.99%) for E. coli and Staphylococcus bacteria to survive. The certification covers all our panel decors, both with and without design patterns.

PANEL SIZES
With panels in the size of 10x620x2400 mm, you can quickly and easily cover the entire wall from floor to ceiling. Some of the decors are also available in 2720mm and 3020 mm for rooms with extra ceiling height.

Kitchen Boards are panels in the standard size of 10x620x580 mm, designed for the splash zone between the kitchen counter and wall cabinets. These panels protect the wall from splashes of water and cooking.

Fibo wall panels are made with a core of plywood produced from PEFC-certified wood species. The panels are pressed and covered with high-pressure laminate to create the membrane on the front. By using Fibo Seal in the joints, you achieve a 100% waterproof and environmentally friendly wall tailored to your needs.

FIBO | WALLS BUILT FOR LIFE

THE SUSTAINABLE CHOICE

UP TO 45% LOWER CARBON EMISSIONS COMPARED TO TILES
An independent report from the consulting firm Asplan Viak documents that a bathroom constructed with Fibo results in up to 45% lower carbon emissions compared to a tiled bathroom. The calculations consider the overall carbon footprint, from production, transport, and installation to the point where the product has broken down and returned to nature.

A SMART CHOICE FOR BOTH THE ENVIRONMENT AND YOUR WALLET
At Fibo, we are dedicated to sustainability. We have set specific goals and committed to environmental responsibility by adhering to both the ESG (Environmental, Social, Governance) framework and the UN's sustainability goals. Our factory in Lyngdal is ISO14001 certified, the gold standard in environmental management systems. Our wall panels are made from PEFC-certified wood, guaranteeing sustainable forestry, and they come with their own EPD that documents environmental calculations for both raw materials and production.
